### UNIT NUMBERS, UNIT TYPES, UNIT DESCRIPTIONS, APPROXIMATE NET LIVING AREAS, APPROXIMATE NET LANAI AREAS, COMMON INTERESTS, RESIDENTIAL/COMMERCIAL UNIT CLASS COMMON INTEREST, PARKING STALLS AND STORAGE ROOMS/STORAGE LOCKERS (Cont'd)

- A. Layout and Floor Plans of Units. There are one hundred seven (107) materially different Residential Unit types (including “reverse” types). Each type has the number of bedrooms and bathrooms and the layouts depicted on the Condominium Map and set forth above. There is one (1) type of Commercial Unit. The Commercial Unit does not have any bedrooms or bathrooms and the layout of the Commercial Unit is as depicted on the Condominium Map.
- B. Approximate Net Living Areas. The approximate net living areas of the Commercial Unit and the Residential Units are based on measurements taken from the interior surface of all perimeter walls, except that no reduction has been made to account for interior walls, ducts, vents, shafts, stairways and the like located within the perimeter walls.
- C. Common Interest. The Common Interest for each of the two hundred twenty (220) Units, including both the Commercial Unit and the Residential Units, in the Project is calculated based on dividing the approximate net living area of the Unit by the total net living area of all Units in the Project. In order to permit the Common Interest for all Units in the Project to equal exactly one hundred percent (100%) in the aggregate, the Common Interest attributable to the resident manager’s Unit (Unit 1306, as described in **Exhibit C**) has been decreased by 0.000005%.
- D. Commercial Unit Class Common Interest and Residential Class Common Interest. The Commercial Unit Class Common Interest of any Commercial Unit is calculated by dividing the approximate net area of the Commercial Unit by the total net area of all Commercial Units in the Project. In order to permit the Commercial Class Common Interest for all Commercial Units in the Project to equal exactly one hundred percent (100%) in the aggregate, the Initial Commercial Owner may increase or decrease the Commercial Class Common Interest appurtenant to a particular Commercial Unit by rounding in a fair and equitable manner. The Residential Class Common Interest is calculated by dividing the approximate net living area of the Residential Unit by the total net living area of all Residential Units in the Project. In order to permit the Residential Class Common Interest for all Residential Units in the Project to equal exactly one hundred percent (100%) in the aggregate, the Residential Class Common Interest attributable to the resident manager’s Unit (Unit 1306) has been decreased by 0.000011%.

E. Parking Stalls, Storage Rooms and Storage Lockers. Each Residential Unit has as an Individual Limited Common Element the parking stall(s) as listed above. Other numbered parking stalls (including the Residential Guest Parking) not otherwise identified as Individual Limited Common Elements above in the Residential Development are described in Exhibit C as being appurtenant to the Residential Unit 1306. Developer has reserved the right to redesignate such parking stalls, storage rooms and storage lockers currently appurtenant to Residential Unit 1306 to other Residential Units in the Project as Individual Limited Common Elements appurtenant to such Residential Units.

F. Lanais and Amenities. The Residential Units each have Individual Limited Common Element lanais with square footages as set forth above. Some Residential Units also have Individual Limited Common Element garages, yards, pools and spas as set forth above.
